SUMMARY

Motivated and detail-oriented fresher skilled in Python, Matplotlib, Pandas, SQL, Excel, and Power BI. Completed 5+ end-to-end projects, achieving up to **85% model accuracy**, handling datasets of **over 100K+ rows**. Proficient in **data cleaning, visualization, and storytelling**, with hands-on experience in identifying trends, uncovering insights, and delivering actionable recommendations. Strong foundation in **ETL workflows** and passionate about transforming raw data into business value. Adept at collaborating in team environments to build data-driven solutions and support strategic decision-making.

SKILLS

Technical Skills

Python | SQL | Tableau | Excel | ETL | Motivated | Power BI | Microsoft Office

Soft Skills

Problem-solving | Critical Thinking | Attention to Detail | Storytelling with Data | Motivated

PROJECTS

Mutual Fund Performance Analysis Project

Jan 2025 - Present

- Extracted and processed data of 100+ mutual funds with 5+ years of monthly returns using advanced **SQL queries**.
- Calculated performance metrics such as **CAGR, volatility**, and **drawdown** directly in SQL to **streamline analysis**.
- Applied **complex joins, window functions**, and aggregations for ranking funds based on risk-return profiles.
- Created interactive dashboards and comparison reports in **Power BI** to support **data-driven investment decisions**.
- Used **Python** and **Excel** for supplementary analysis and data validation.
- Optimized SQL queries to handle large datasets efficiently.

COVID-19 Global Insights Dashboard

Apr 2025 - Present

- Developed an interactive COVID-19 dashboard using **Python, Matplotlib**, and **Seaborn** to visualize trends across 190+ countries.
- Processed and transformed 50,000+ rows of data with Pandas, aggregating case statistics by region, date, and severity.
- Created **dynamic, user-friendly visualizations** including **time-series plots, heatmaps**, and **color-coded graphs** to display daily trends, recoveries, and fatalities.
- Integrated interactive features (dropdowns, filters) to allow users to explore data by date range and location, improving accessibility for non-technical users.

CUSTOMER SALES ANALYSIS

Mar 2025 - Jun 2025

- Utilized SQL to extract data from 8 different related tables from customer sales databases using JOIN and VIEW
- Transformed and filtered data by using aggregating and filtering function to improve reporting process
- Loaded and visualized data with Python to identify key business intelligences that can improve sales performance

EDUCATION

B. Tech : Sagar Institute of Research and Technology Excellence
Artificial Intelligence and Data Science

Jul 2021 - Jun 2025

Degree: Kendriya Vidyalaya J.L.A. Bareilly Cantt
PCM with Computer Science

Apr 2020 - Apr 2021

CERTIFICATIONS

Data analyst - Cybrom Technology Pvt. Ltd., Bhopal

Nov 2024 - Jul 2025

- **Data Analysis & Visualization** – Proficient in using Pandas, NumPy, Matplotlib, and Seaborn to explore, clean, and visualize data.
- **Statistics & Probability** – Solid understanding of descriptive statistics, distributions, hypothesis testing, and inferential techniques.
- **Data Preprocessing** – Skilled in data wrangling, missing value handling, feature engineering, and scaling techniques.
- **Programming with Python** – Strong coding foundation with emphasis on functions, libraries, loops, and data structures for analysis.

- **SQL & Databases** – Able to query relational databases using SQL for data extraction and manipulation.
